PROPOSAL FOR CLINICAL MANAGEMENT SYSTEM - PROPOSAL

This Agreement is entered into on this 26th day of January **2026**,

by and between

Opeyemi Abdulrauff (Client), residing at Lagos, Nigeria
and
Forahia Enterprise (Consultant), Abuja, Nigeria.

1. INTRODUCTION

This agreement outlines the terms and conditions under which Forahia Enterprise will provide consulting services for the design, development, and deployment of a comprehensive Clinical Management System for the Client. The platform will integrate patient management, appointments, clinical visits, treatments, prescriptions, pharmacy inventory, and billing into a unified web-based system.

Technology Stack:

- **Frontend: React.js - Modern web application**
- **Backend & Admin: Laravel with Filament - Administrative dashboard**
- **Database: MySQL**
- **Infrastructure: Hostinger VPS Cloud Hosting**

2. PROJECT OVERVIEW

The Clinical Management System aims to digitize and streamline clinic operations, enabling efficient management of patient records, appointments, treatments, prescriptions, and billing. The system will serve healthcare practitioners, nurses, and administrative staff with role-based access to ensure secure handling of medical data.

3. PROJECT OBJECTIVES

- Develop a user-friendly web application for patient registration and management
- Create appointment scheduling and tracking system
- Build clinical visit documentation with vitals recording and diagnosis
- Implement treatment and therapy management modules
- Establish prescription generation and pharmacy inventory tracking
- Automate billing and payment processing with receipt generation
- Provide comprehensive reporting and analytics dashboard
- Ensure data security and audit logging for compliance

4. SCOPE OF WORK

In-Scope

Deliverable	Description
Patient Management Module	Registration, demographics, contact info, next of kin details, medical history
Appointments Module	Scheduling, calendar views, status tracking, reminders
Clinical Visits Module	Visit documentation, vitals recording (BP, weight, glucose, BMI), complaints, diagnosis
Treatment & Therapy Module	Treatment types, therapy methods, progress notes, health status tracking
Prescription Module	Drug selection, dosage instructions, prescription printing
Pharmacy/Inventory Module	Drug catalog, stock management, low stock alerts, expiry tracking

Deliverable	Description
Billing & Payments Module	Automatic billing, payment recording, receipt generation, outstanding balance tracking
Admin Dashboard	Comprehensive dashboard with reports, analytics, and system management
User Role Management	Role-based access for Admin, Doctor, Nurse, and Receptionist

Out-of-Scope

Item	Description
Laboratory equipment integration	Physical lab machine connections or automated result imports
Medical imaging storage	X-ray, MRI, or other imaging file management beyond basic upload
Insurance processing	Health insurance claims, HMO integrations, or third-party billing
Telemedicine features	Video consultations or remote diagnosis capabilities
Mobile native apps	iOS/Android native applications (web app is responsive for tablets)
Multi-clinic/chain management	Features for managing multiple clinic locations
Legal compliance certification	Client responsible for NAFDAC, HIPAA, or other regulatory compliance

5. PROBLEM STATEMENT

The growing need for efficient healthcare delivery requires a cohesive digital system where clinics can manage patient information, track appointments, document clinical encounters, manage pharmacy inventory, and handle billing in one platform. Existing solutions are often fragmented, expensive, or poorly suited for small-to-medium clinics. There is a significant need for an affordable, integrated system that streamlines clinical workflows while maintaining data security and audit compliance.

6. PROPOSED SOLUTION

The Clinical Management System will integrate patient records, appointments, clinical visits, treatments, prescriptions, pharmacy management, and billing into one unified web-based platform. The system will ensure accessibility across desktop and tablet devices, provide role-based access for different staff levels, and maintain comprehensive audit logs for compliance. It will feature automated billing calculations, stock alerts, and detailed reporting to support clinic decision-making.

7. PROJECT EXPECTED DELIVERABLES

SN	Deliverable	Description
1	Patient Management System	Registration forms, patient search, profile views, medical history timeline
2	Appointment Scheduling System	Calendar interface, booking forms, status management, reminders
3	Clinical Visit Documentation	Visit creation, vitals input, diagnosis recording, follow-up scheduling
4	Treatment & Therapy Records	Treatment selection, therapy methods, progress notes, health summaries

SN	Deliverable	Description
5	Prescription Management	Drug selection, dosage instructions, professional prescription printing
6	Pharmacy Inventory System	Drug catalog, stock tracking, low stock alerts, expiry monitoring
7	Billing & Payment System	Automatic billing, payment recording, receipt printing, balance tracking
8	Admin Dashboard & Reports	Clinic overview, revenue analytics, patient statistics, drug usage reports
9	User Management & Security	Role-based access control, audit logging, data backup
10	Comprehensive Documentation	Technical documentation, user manuals, training materials

8. ROLES AND RESPONSIBILITIES

8.1 Client Responsibilities

Responsibility	Description
Provide project requirements	Define clinic workflows, user roles, and specific feature needs
Approve milestones	Review and approve deliverables within agreed timelines (1 week review window)

Responsibility	Description
Participate in feedback	Provide timely feedback during bi-weekly project updates and demos
Supply branding assets	Provide clinic logo, brand colors, and contact information
Domain and hosting setup	Provide domain name or hosting account access if preferred
Staff availability	Make key staff available for requirements gathering and training
Legal compliance	Ensure clinic operations comply with local healthcare regulations

8.2 Consultant Responsibilities

Responsibility	Description
Develop project plan	Prepare detailed timelines, sprint plans, technical architecture, and milestones
UI/UX design	Create intuitive interface designs for all user roles (Admin, Doctor, Nurse, Receptionist)
Implement development	Complete frontend (React), backend (Laravel/Filament), and database (MySQL) development
System integration	Integrate all modules (patient, appointments, visits, treatments, prescriptions, billing)

Responsibility	Description
Conduct testing	Perform quality assurance, security testing, and performance optimization
Deploy infrastructure	Set up Hostinger VPS servers, configure domains, SSL, and monitoring
Provide documentation	Deliver technical documentation, user guides, and training materials
Post-launch support	Provide three months of technical support and bug fixes after launch

9. REMUNERATION

The Client agrees to pay Forahia Enterprise the following amounts for the complete development and deployment of the Clinical Management System:

Component	Amount (USD)	Amount (NGN)
Frontend Development (React)	$2,500	₦3,500,000
Backend & Admin Development (Laravel/Filament)	$2,800	₦3,920,000
Database Design & Optimization	$800	₦1,120,000
UI/UX Design	$1,100	₦1,540,000
Quality Assurance & Security	$900	₦1,260,000

Component	Amount (USD)	Amount (NGN)
Infrastructure Setup & Deployment	$400	₦560,000
Project Management	$1,200	₦1,680,000
Subtotal	**$9,700**	**₦13,580,000**
Discount Applied	($700)	(₦980,000)
TOTAL PROJECT BUDGET	**$9,000**	**₦12,600,000**

Exchange rate: $1 = ₦1,400

Payment Terms:

Payment is required before the commencement of each phase according to the following milestone schedule:

Milestone	Deliverable	Percentage	Amount (USD)	Amount (NGN)
1. Contract Signing	Project kick-off, team assembly, design phase initiation	60%	$5,400	₦7,560,000
2. Design Approval	Completed UI/UX designs, prototypes approved	10%	$900	₦1,260,000

Milestone	Deliverable	Percentage	Amount (USD)	Amount (NGN)
4. Frontend Beta	React app functional, integrated with API, ready for UAT	10%	$900	₦1,260,000
5. Final Delivery	System deployed, staff trained, documentation complete	10%	$900	₦1,260,000
TOTAL		**100%**	**$9,000**	**₦12,600,000**

Annual Support (Optional): ₦1,200,000 for Year 2 onwards covering updates, monitoring, security patches, and minor feature enhancements.

10. PROJECT IMPLEMENTATION PLAN

Phase	Timeline	Description
Phase 1: Discovery & Design	Weeks 1-3	Requirements finalization, workflow mapping, UI/UX design for all modules, prototype approval
Phase 2: Backend Development	Weeks 4-8	Laravel API development, Filament admin panels, MySQL database setup, core business logic
Phase 3: Frontend Development	Weeks 6-10	React application development, API integration, form components, dashboard widgets (overlaps with Phase 2)

Phase	Timeline	Description
Phase 4: Integration & Testing	Weeks 9-11	Module integration, comprehensive testing, security audit, bug fixes, UAT
Phase 5: Deployment & Training	Week 12	Production deployment, staff training, documentation handover, go-live support

Total Duration: 12 weeks (3 months)

11. CONFIDENTIALITY

Both parties agree to keep all proprietary and confidential information private and secure during and beyond the project's duration. This includes patient data, business strategies, technical architecture, and financial details. Forahia Enterprise agrees not to disclose or reuse Client's proprietary concepts for other projects without written consent.

Patient data handling will follow industry best practices for security and privacy. Forahia implements technical safeguards; Client is responsible for staff training on data protection procedures.

12. INTELLECTUAL PROPERTY RIGHTS

Upon full payment of all milestones, all intellectual property rights for the completed system (source code, designs, documentation, and related assets) will transfer to the Client. Forahia Enterprise retains the right to showcase the project in portfolios and case studies without revealing proprietary business logic, patient data, or confidential information.

Third-party services (hosting, email, SMS) remain subject to their respective terms of service.

13. TERM AND TERMINATION

This agreement shall commence on the date of signing and continue until project completion and warranty period expiration (approximately 3 months).

Termination Clause:

- Either party may terminate this agreement with 30 days' written notice
- Client remains responsible for payment for all work completed up to termination date
- Upon termination, Forahia will deliver all completed work and documentation prorated to payment received
- If Client terminates after Phase 3 (Backend Beta), all frontend code and designs will be delivered
- If terminated by Forahia due to non-payment, all work ceases immediately and IP remains with Forahia until payment is settled

Suspension:

- Project may be suspended for up to 30 days at Client's request (timeline adjusts accordingly)
- Suspension beyond 30 days may incur team reallocation fees of $1,500/month

14. WARRANTIES AND SUPPORT

Development Warranty: Forahia Enterprise warrants that:

- All code will be original or properly licensed
- The system will function as described in deliverables
- No malicious code or backdoors will be included
- Best security practices will be implemented

Post-Launch Support (3 Months):

- Bug fixes for issues arising from development errors
- Minor adjustments to workflows or business logic
- Monitoring and alert response for server issues

- Response time: Critical issues (24 hours), Standard issues (72 hours)

Exclusions from Warranty:

- Issues caused by third-party service changes
- Problems arising from Client's server modifications post-handover
- Bugs in third-party libraries or frameworks
- Issues caused by unauthorized code changes by Client or third parties

15. LIMITATION OF LIABILITY

Forahia Enterprise's total liability shall not exceed the total amount paid by Client under this agreement. Forahia is not liable for:

- Lost profits or business interruption
- Data loss due to Client's failure to maintain backups
- Issues arising from third-party service outages
- Regulatory compliance violations

16. GOVERNING LAW

This contract shall be governed by and interpreted in accordance with the laws of the Federal Republic of Nigeria. Any disputes arising from this agreement shall first attempt resolution through good-faith negotiation. If unresolved, disputes shall be submitted to arbitration in Abuja, Nigeria, under the Arbitration and Conciliation Act.

17. ENTIRE AGREEMENT

This agreement constitutes the entire understanding between the parties and supersedes all prior agreements, whether written or oral. Any amendments must be in writing and signed by both parties.

18. NOTICES

All notices under this agreement shall be sent via email to:

Client: Opeyemi Abdulrauff's email

APPENDIX A: SYSTEM SPECIFICATIONS

A.1 Frontend (React Web Application)

- Modern responsive design for desktop and tablet use
- Optimized for clinical workflows (patient registration, visit documentation, prescription printing)
- Role-based interface (Admin, Doctor, Nurse, Receptionist)

A.2 Backend & Admin (Laravel with Filament)

- Secure API for frontend communication
- Comprehensive admin dashboard with reporting
- Automated billing calculations
- Audit logging for all data access

A.3 Database (MySQL)

- Secure storage for patient records, appointments, visits, prescriptions, and billing
- Automated backups with encryption
- Optimized for clinic workload patterns

A.4 Infrastructure (Hostinger)

- VPS hosting with SSL encryption
- Daily automated backups
- 99.9% uptime monitoring

APPENDIX B: ACCEPTANCE CRITERIA

Project deliverables will be considered complete when:

1. Functional Requirements: All modules in Section 7 operate without critical bugs
2. Performance: System responds within 2 seconds for all operations
3. Security: Pass security audit with no critical vulnerabilities
4. UAT: Client approves user acceptance testing with clinic staff
5. Documentation: All user manuals and technical documentation delivered
6. Training: Staff training completed with at least 3 Client representatives
7. Go-Live: System successfully processing real patient data for 1 week without issues

This contract is ready for signature. Please review all sections carefully before signing. Forahia Enterprise looks forward to delivering a world-class Clinical Management System for your healthcare practice.
